

# CONSERVATION OF ENERGY

# CONTENTS

---

- Energy
- Forms of Energy
- Conversion of Energy from One Form to Another
- Energy Transducers
- Sources of Energy
- Electricity Production
- Energy Usage – Past and Present

# CONTENTS

- Energy Conservation
- Velocity
- Momentum
- Collisions
- Reflection of Light
- Focus/ Focal Point of a Mirror
- Newton's Cradle and the Conservation of Momentum

# ENERGY

---

- The ability to do work

# ENERGY

- Cannot be created
- Cannot be destroyed
- Is passed on from one object to the next
- Is changed from one form to another
- Is always wasted as **HEAT**

# FORMS OF ENERGY

- Potential
- Chemical
- Nuclear
- Electrical
- Heat
- Kinetic
- Radiant
- Light
- Sound
- Mechanical
